SIX OAKS RENEWABLE ENERGY PARK Typical Solar Panel and Frame Elevation

Figure 7.2

SIX OAKS RENEWABLE ENERGY PARK Typical Access Track Detail

Figure 7.3

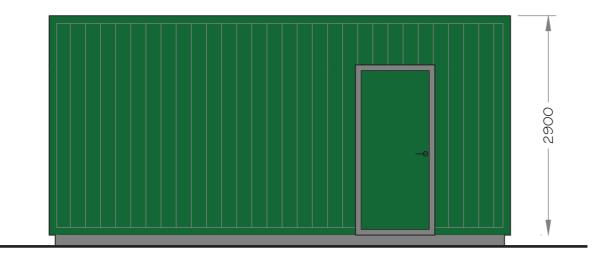

NOTES

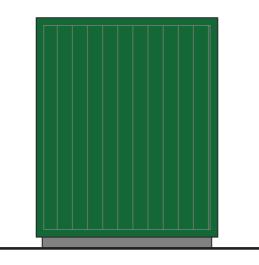

1	All measurements in millimetres, unless stated otherwise
2	The thickness of the gravel layer depends on the load-bearing capacity of the subsoil
3	The gravel must be placed in layers and compacted.
4	The required number of ductworks must be determined and can be higher than shown in the drawing

SIX OAKS RENEWABLE ENERGY PARK Typical Site Fencing Detail

Figure 7.7

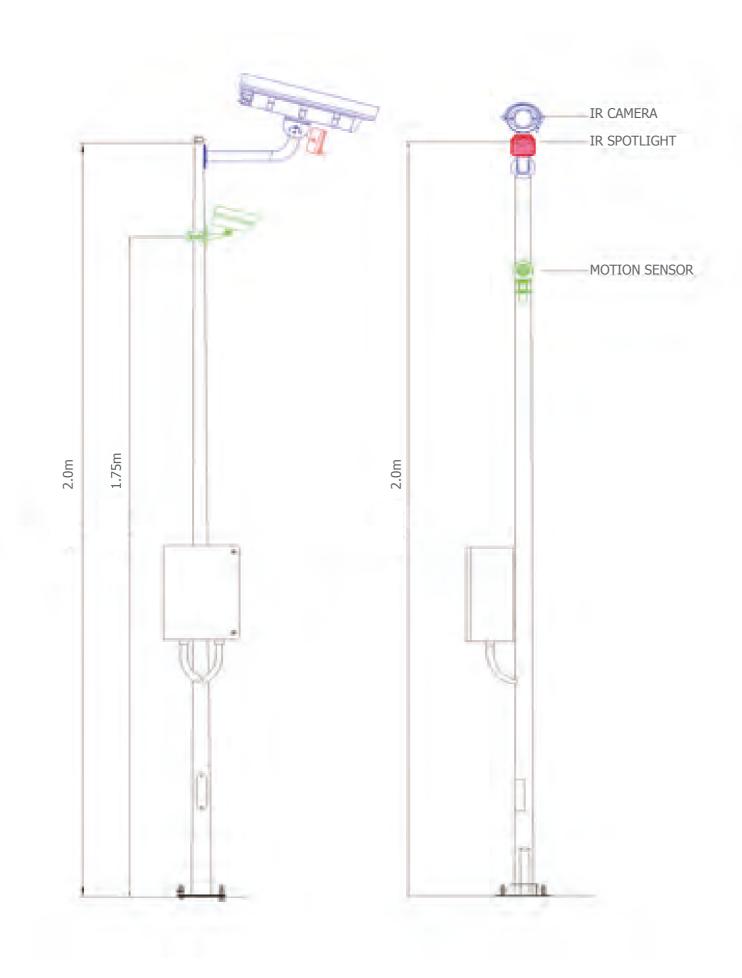

NOTES

All measurements in millimetres, unless stated otherwise
1.8m High Tensile Deer Fencing
Fencing raised by 150mm to allow for passage of small animals.
Gates installed across access track at both ends.
Post depth according to ground conditions.

PREPARED ON BEHALF OF

SIX OAKS RENEWABLE ENERGY PARK Typical CCTV Detail

Figure 7.8

NOTES

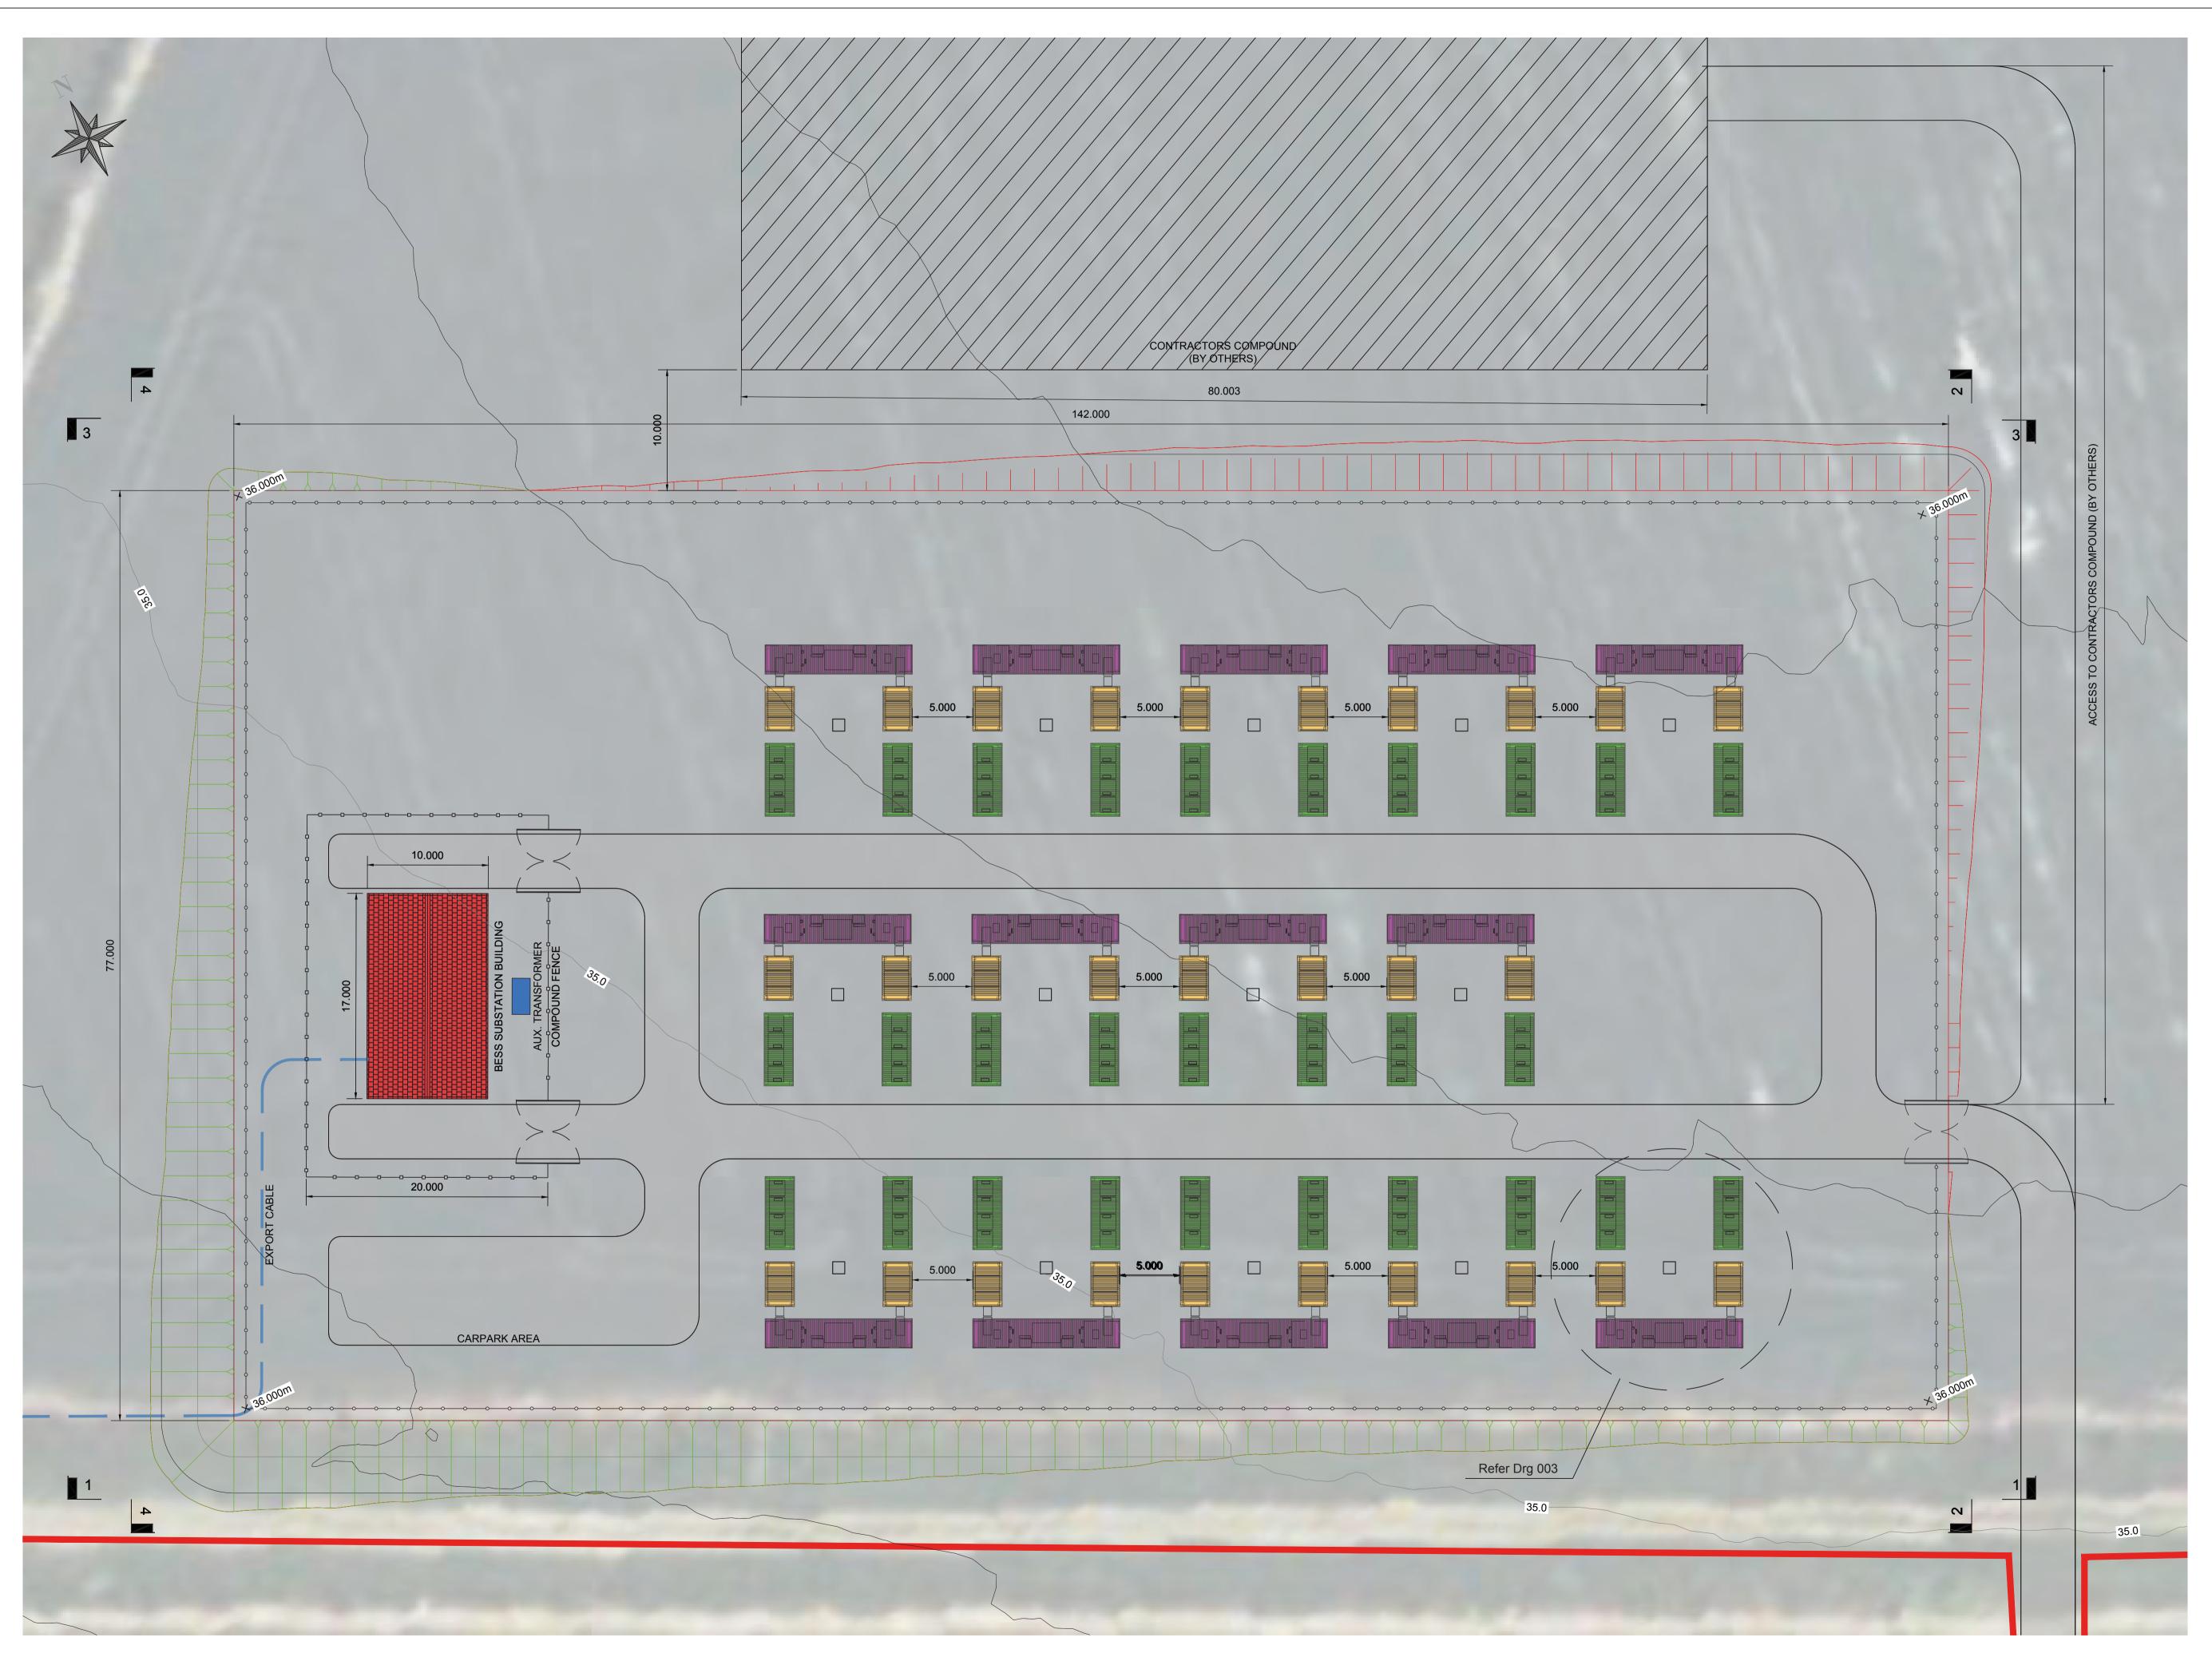

1	Exact equipment to be procured prior to
1.	construction in agreement with the LPA.

2. Cameras to be inwards-facing.

SIX OAKS RENEWABLE ENERGY PARK

Bare Earth Zone of Theoretical Visibility

Theoretical Visibility of 1 to 3 locational markers

Theoretical Visibility of 4 to 6 locational markers

Theoretical Visibility of 7 to 9 locational markers

Theoretical Visibility of 10 to 12 locational markers

The analysis was undertaken on a bare earth basis and does not take into account the screening effects of vegetation, buildings or other
