About the Project

Ridge Clean Energy are proposing the **Three Oaks Renewable Energy Park Extension**, an onshore wind farm, adjacent to the recently approved Three Oaks Renewable Energy Park, on land between Thornholme and Haisthorpe in the East Riding of Yorkshire. The project would include **6 wind turbines** (each with a maximum tip height of up to **149.9 metres**). The site would be accessed from the A614, using the local road network.

Key Facts

- The scheme would, on average, generate as much electricity each year as is used by approximately **24,000** East Riding of Yorkshire homes.
- Community Benefit Fund would contribute over **£5 million** over the lifetime of the project, supporting community projects and could provide local energy discounts to households near the site.
- 40 year operational period.
- Approximately **6-9 month** construction period.
- Fully decommissioned after operational period.
- The addition of wind to the already approved Three Oaks solar farm would create a hybrid renewable energy park supporting the UK's ambition to become a clean energy superpower. The scheme would deliver an excellent source of secure and reliable renewable energy at a time when it is needed most.

The following map shows the proposed location of the wind turbines within the fields shaded in red.

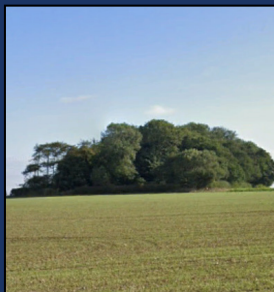

Three Oaks Renewable Energy Park Extension Site

The project would deliver up to **25.2MW** of renewable energy, which would generate as much electricity each year as is used by up to **24,000 homes** (based on average domestic East Riding of Yorkshire consumption per household of **3,223.6kWh** – DESNZ, 2023). The environmental survey work has commenced and will be ongoing through this summer and autumn.

The project would create a considerable Community Benefit Fund, which could be used for local projects and initiatives, and potentially provide an energy rebate for properties surrounding the site. Additionally, we are keen to continue our ongoing collaboration with local councils and organisations, to identify and support existing community projects and help new, local ideas become a reality.

About Ridge Clean Energy

Working in partnership with land owners and local communities, **Ridge Clean Energy's (RCE)** team identifies and develops new projects to supply clean energy to homes, businesses, and other power consumers. The RCE team have a wealth of experience with community engagement support and have created a range of local initiatives in small towns and villages that focus on improving community life.

You are invited to our Public Exhibition

Newsletter July 2025

Public Exhibition: Three Oaks Renewable Energy Park Extension

You are invited to our Public Exhibition to learn more about the proposed Three Oaks Renewable Energy Park Extension. Join us to review our ideas for a wind farm on land to the north of the A614 between Thornholme and Haisthorpe.

The first exhibition will be held Monday, **14th July**, 2pm until 7pm at
Burton Agnes Sports Club, Rudston Road, Burton Agnes

The second exhibition will be held Tuesday, **15th July**, 2pm until 7pm at
Ferns Farm Hotel, 29 Main Street, Carnaby

The third exhibition will be held Wednesday, **16th July**, 2pm until 7pm at
Rudston Village Hall, 3 Marton Lane, Rudston

Refreshments are provided.
